Summary

Full stack engineer with experience designing and delivering end-to-end features across React, React Native, Node.js, and .NET. I've led small development teams, contributed to long-running enterprise systems, and independently launched multiple mobile apps on both major app stores.

Education

Plattsburgh University, NY

- B.S. in Computer Science
- Minor in Graphic Design
- Sept 2017 - May 2021

Skills

- React/React Native
- Typescript/Javascript
- Redux/Tanstack Query/Zodios/Zod/Yup
- React Hook Form/Formik
- Node.js/Express
- C#/ASP.NET
- REST APIs/Entity Framework/CQRS
- Python/Flask
- SQL/NoSQL/MongoDB
- Unity/Playfab
- HTML/CSS/Bootstrap/Material UI
- Git/AWS/Azure/Heroku/Docker/CI/CD
- Expo/iOS & Android App Development
- Unit & Integration Testing/Jest
- Agile Practices/Scrum
- Adobe Suite

Experience

Full Stack Software Engineer

Nov 2021 - Present

CAMP

Full Time - Remote

- Designed, developed, and delivered full-stack features using **React**, **TypeScript**, **.NET**, and **C#**, translating complex client requirements into scalable, user-centric solutions.
- Refactored and enhanced existing systems by optimizing database queries and REST API endpoints (CQRS pattern), and performing frontend performance enhancements with code splitting and lazy loading.
- Led cross-functional feature teams, providing technical direction, conducting code reviews, and ensuring timely, high-quality releases in our **Azure** pipeline.
- Collaborated closely with product, QA, and design to drive end-to-end implementation, from architecture and planning through deployment.

Lead Developer - Tater Tap

Dec 2023 - April 2025

<https://apps.apple.com/us/app/tater-tap/id6742767053>

- Developed and launched Tater Tap, a fast-paced mobile game available on both app stores, overseeing the full product lifecycle from concept to release.
- Built the game with **Unity/C#**, with integrated systems for in-app purchases, in-game economy, third party authentication (Google, Meta, Apple), and advertisements.
- Optimized gameplay performance, implemented polished UX, created assets in **Adobe Illustrator**, and ensured a stable experience across **iOS** and **Android** environments.
- Managed all publishing workflows, including app store deployment, compliance, and release management.

Lead Developer - unCaged

Oct 2020 - Jan 2022

<https://apps.apple.com/us/app/uncaged/id1593978532>

- Designed and published unCaged, a mobile app enabling users to browse and rate Nicolas Cage's prolific filmography.
- Built the frontend with **React Native**, implemented backend services with **Node.js** and **Express**, managed data using **MongoDB**, and deployed with **Expo**, delivering a smooth, responsive, cross-platform experience.
- Architected the app's data flow, optimized API interactions, and handled deployment to both **iOS** and **Google** stores.

Full Stack Software Engineer

July 2021 - Oct 2021

Materiality / Datapoint Labs

Intern - Ithaca, NY

- Developed and refined production features for internal and client-facing software using **React**, **Typescript**, **ASP.NET**, and **C#**, enabling engineers to efficiently upload, analyze, and share material data.
- Collaborated with senior engineers to translate scientific requirements into intuitive software tools supporting materials laboratories with very large datasets.
