Education

Plattsburgh University, NY

B.S. in Computer Science
Minor in Graphic Design
Sept 2017 - May 2021

Skills

- **React/React Native**
- **Typescript/Javascript**
- **Node.js**
- **C#/.NET**
- **Entity Framework/CQRS**
- **RESTful APIs**
- **Python**
- **SQL/NoSQL DBMS**
- **Unity/Playfab**
- **CSS/Tailwind/MUI**
- **Git/Docker/AWS/Azure**
- **Expo/Heroku**
- **Linux**
- **Agile Practices/Scrum**
- **Graphic Design/Adobe**

Experience

Full Stack Engineer

Nov 2021 - Present

CAMP

Remote

- Designed, developed, and delivered full-stack features using React, TypeScript, .NET, and C#, translating complex client requirements into scalable, user-centric solutions.
- Led cross-functional feature teams, providing technical direction, conducting code reviews, and ensuring timely, high-quality releases.
- Enhanced and maintained existing systems by writing clean, performant, and maintainable code, improving reliability and long-term sustainability of the platform.
- Collaborated closely with product, QA, and design to drive end-to-end implementation, from architecture and planning through deployment.

Tater Tap

Dec 2023 - April 2025

<https://apps.apple.com/us/app/tater-tap/id6742767053>

- Developed and launched Tater Tap, a fast-paced mobile game available on major app marketplaces, overseeing the full product lifecycle from concept to release.
- Built the game in Unity with integrated systems for in-app purchases, game economy, player authentication, and advertisements.
- Optimized gameplay performance, implemented polished UX, and ensured a stable experience across iOS and Android environments.
- Managed all publishing workflows, including app store deployment, compliance, and release management.

unCaged

Oct 2021 - Jan 2022

<https://apps.apple.com/us/app/uncaged/id1593978532>

- Designed and published unCaged, a mobile application enabling users to browse, rate, and track Nicolas Cage's extensive filmography.
- Built the frontend with React Native, implemented backend services in Node.js, and managed data using MongoDB, delivering a smooth, responsive cross-platform experience.
- Architected the app's data flow, optimized API interactions, and handled deployment to both iOS and Android stores.

Full Stack Engineer Intern

July 2021 - Oct 2021

Materiality / Datapoint Labs

Ithaca, NY

- Developed and refined production features for internal and client-facing software using React, F#, .NET, and C#, enabling engineers to efficiently upload, analyze, and share material data.
- Collaborated with senior engineers to translate scientific requirements into intuitive software tools supporting materials laboratories.
